Light Pen

MARK II

This package comprises a user friendly graphics program with detailed manual and a Light Pen which plugs directly into the edge connector of the Amstrad

Simple, easy, and relaxing to use, it features:

- Pseudo colour tones, allowing more than the normal 16, 4, and 2 colours in each mode.
- IRSX light pen environment for writing your own software to work with the pen.
- Full size/16 tone/picture quality screen dump to Epson compatible printers.
- Fully detailed manual printed in English, French, and German.
- Mode 0, 1 & 2 Packages
- Simple to use Icon menu with symbols representing functions, allowing all ages to construct simple pictures, or complex technical work.
- Icon/symbol/shape/sprite create function giving total flexibility to the users design work requirement; i.e. electronic circuit design, PCB overlays, building & engineering work, game screen design.
